

Capability Statement

Core Competencies

Designs by Solly Prides itself on its breadth of knowledge on all matters of Design, Drafting and Minor Engineering. While Residential and Commercial design is a staple in the industry, it's the cooperation and close relationships with a multitude of specialists, including qualified engineers and surveyors that lets us truly live up to the phrase "one stop shop".

Just some of the services offered by Designs by Solly include;

- 3D Mechanical design and engineering with 27 years trade and tertiary expertise
- Specialized CAD programs such as Solidworks and Envisioneer as well as the industry standard AutoCAD 2D and 3D.
- Unique approach to Drafting, just about everything needed for construction, whether that be engineering computations, extensive 3D contour site mapping, structural shop details or HD 3D renderings of the final product are included
- Flexible time schedules and industry defining friendly service

Differentiators

What sets Designs by Solly apart from other drafting businesses in the region are the close relationships with Qualified Tradesman and Engineers through all facets of design. This gives us the advantage of being able to quote and collect any relevant information for the client without any effort on their part, offer services at competitive prices all over Australia (remote or on site) and recommend top quality tradesman to complete the job.

Past Performance

Designs by solly has been involved in a wide variety of design since its conception in 2004 and has developed an extensive range of skills to deal with any challenges should they arise. Some examples of design work completed;

- Mt Gambier Prison High Security Fencing Design and Detailing
- Mt Gambier Hospital Redevelopment
- Jen's Hotel Redevelopment
- Carter Holt Harvey Morwell Sawmill extension
